

We are looking for ...

Open Application (m/w/d) – Digital Manufacturing

We believe that every factory in the world should be running on open-source.

Meet the team:

We from the United Manufacturing Hub (UMH) are an interdisciplinary team of open-source enthusiasts ready to challenge the status quo of proprietary software solutions in the manufacturing industry.

The UMH Systems GmbH is the company behind the United Manufacturing Hub, which is an Open-Source Industrial IoT platform for manufacturers. Our aim is to digitize factory operation to generate a cost- and time-effective workflow. We are ready to challenge the status quo of proprietary software solutions in the manufacturing industry with our Open-Source software. Our solution includes real-time monitoring, analysis as well as communication, to make the best out of the given data.

Your profile:

You show a high level of initiative, flexibility, and commitment and work carefully and reliably.

Your oral and written communication skills in English are excellent, knowledge of German is an advantage.

You have experience in the field of digital manufacturing or industrial engineering.

Optional you have Front-End/ Back-End development skills.

Your role:

Together with DnA Industry Solutions, we are looking for people to join our team in varying positions in the field of digital manufacturing and industrial engineering. Feel free to contact us if you have skills that could add value to our company. We will do our best to match your capabilities to our needs.

Interested? Simply send your documents to recruiting@umh.app and we will get in touch with you!
